Professional Certificate (in  
progress)

## Experience

### PHARMACY MANAGER CVS

Feb 2022 – current

As pharmacy manager, I oversee daily operations, supervise a team of pharmacists and technicians, and foster a collaborative environment focused on patient care and safety. Through close monitoring of performance-based metrics, I have consistently maintained elevated status for our store while achieving company vaccination targets in 2024 and meeting year-to-date goals for 2025. I have recently completed the CVS DevelopU 1.0 leadership program, applying learned strategies to strengthen team performance and continuously enhance my leadership skills.

### STAFF PHARMACIST CVS

Aug 2017 – Feb 2022

As a staff pharmacist, I worked collaboratively with colleagues to ensure accurate dispensing and safe medication practices while delivering high-quality patient care. During the COVID-19 pandemic, I adapted quickly to rapidly changing policies and procedures, managing increased workloads while maintaining a high standard of care and safety. This role strengthened my ability to operate effectively in high-pressure environments and reinforced the importance of adaptability in healthcare delivery.
